Make GSA Your Source for Shipping and Moving Supplies.

GSA provides support to military and civilian agencies acquiring shipping and moving supplies, while offering flexible options designed to accommodate specific requirements. Together, these benefits present comprehensive and flexible choices suitable for meeting any office product requirement.

Highlights of GSA's Flexible Requisition/Acquisition Methods:

Requisitioning from GSA

GSA Global Supply™ procures shipping and moving supplies meeting the recurring needs of your federal agency or branch of the military. Since GSA Global Supply has already procured the most in-demand shipping and moving supplies on the government's behalf, obtaining these products through GSA Global Supply is a simple requisition between agencies – no comparison shopping is necessary. Standard shipping is included with most orders and “direct delivery” products are clearly identified.

This catalog features some of GSA Global Supply's most popular shipping and moving supplies. To view GSA Global Supply's complete offering of shipping and moving supplies, visit www.GSAGlobalSupply.gsa.gov. Once on the Web site, select “Go” beneath the “Browse Products” option. After you advance to the next page, choose the “Office Supplies” tab and then the labeling, mailing and packaging link. You will find a vast array of products including boxes and containers, mailing supplies, packing material and more.

For additional information about ordering from GSA Global Supply, see page 1 of this publication.

Purchasing from a GSA Vendor

By offering shipping and moving supplies that cover the breadth of the commercial marketplace, the GSA Multiple Award Schedule (MAS) program enables your agency to choose from thousands of office products, available from hundreds of pre-qualified vendors. Typically, this method of procurement is quicker and easier than open-market procurements. Although an acquisition is a more involved option than a requisition through GSA Global Supply, issuing a purchase order through the MAS program may be appropriate for obtaining office products not widely requested enough to be included in the GSA Global Supply inventory. For more information, visit www.gsa.gov/products and click the “Office Supplies and Equipment” link.

Special Order Program

GSA Global Supply has a robust Special Order Program (SOP). Customer agencies can place requisitions for NSN or part numbered items with GSA Global Supply and be assured that GSA will take all the necessary steps to ensure compliance with all Federal Acquisition Regulations (FAR) and Executive Orders. GSA Global Supply's SOP Program includes a wide variety of products and related services such as tools and hardware, office products, cleaning supplies and fire equipment. SOP items can be ordered from GSA Global Supply by calling the GSA Global Supply call center at (800) 525-8027 or via FEDSTRIP/MILSTRIP. GSA Global Supply Stores or Base Stores supported by GSA Global Supply can also assist with placement of SOP orders (visit www.gsa.gov/globalsupply for more information on Global Supply stores and Global Supply base partners).

Ensuring Reuse with GSA Personal Property Management

Screening other agencies' excess personal property inventories is the federal government's priority source of supply. And with today's increased environmental consciousness, reusing excess property is a source of pride. To help you acquire the excess property your agency needs, GSA offers www.gsa.gov/gsexcess, the personal-property reporting tool for the federal government. At GSAXcess®, reporting, searching and selecting excess property is convenient and user-friendly.

In addition to the shipping and moving supplies available through GSA Global Supply, GSA has contracts in place with hundreds of vendors that offer a wide variety of office products. The selection is comparable to that of the commercial marketplace but without the burden of performing an open-market procurement. For detailed descriptions of the products below and vendor listings, please access the GSA eLibrary through www.gsa.gov/elibrary.

Uni-Pak Pallet Sleeve

Complete state-of-the-art storage/shipping system is constructed of heavy-duty AAA-fluted configuration fiberboard sleeve, a plastic top, and a plastic bottom pallet (with four-way entrance capability). The sleeve can be locked with bottom pallet and top to create a rigid and secure system, eliminating strapping and stretch wrapping. The rugged and impact-resistant bottom pallet and top are formed from two sheets of high-density

polyethylene. Palletized loads (up to 10,000 lbs.) can be stored up to four high. The 40" x 48" bottom pallet and top have nesting capabilities to save space and stack securely. Reusable system is designed for years of service. Sleeves are collapsible and designed to occupy nearly 30% less space than traditional systems.

Designed for use with Uni-Pak top NSN 8115-01-444-0211 and pallet bottom NSN 8115-01-444-0206. Drop panel included to provide easy access to each container even when stacked.
